Projects

Price Tracker Website

- This website offers clients the convenience of tracking prices for any product available on the Nintendo Eshop.
- Users will receive email alerts the moment their desired product prices drop.
- The process consists of just three steps:
 - Enter the email address where you wish to receive the alerts
 - Copy and paste the URL of the product you want to track (from [Nintendo Eshop Store](#)).
 - Click the submit button to activate the tracking.
- Upon registration and login, users gain access to a personalized dashboard where they can:
 - View the quantity of products they are tracking.
 - Access a fully responsive tracking table, providing a comprehensive overview of all tracked products.

Bloomyu

- Our platform provided a seamless experience for candidates, allowing them to:
 - Search for jobs
 - Manage their profiles
 - Upload resumes
 - Directly apply to companies posting job openings
- On the company side, our platform empowered HR professionals to:
 - Effortlessly create company profiles
 - Post job listings
 - Specify:
 - Job titles
 - Descriptions
 - Locations
 - Working types
 - Contract details
 - Experience levels
 - Salaries
 - And more
- During working time in this project, I had the opportunity to:
 - Immerse myself in the Next.js framework
 - Enhance my frontend development skills significantly
 - Gain experience working with backend server
 - Improve my understanding of database operations
 - Acquire much more knowledge.

Yahoo Chat-app

Reflecting on the early days of the Internet and the advent of Yahoo Messenger, I've created:

- A fully responsive web application for real-time messaging.
- Users can register, log in, and communicate instantly with others.
- The application captures the nostalgia of the past while embracing modern convenience.
